

# Tierrafino Clay Paint

## Solvent-free wall and ceiling paint for interior use

### INTRODUCTION

Tierrafino Clay Paint is a flexible, durable, solvent-free wall and ceiling paint for interior use. Tierrafino Clay Paint provides a breathing surface and regulates variations in humidity contributing to a healthy internal environment. It is antistatic, covers fully while still wet and is virtually non-drip. It covers exceptionally well because of its high solid content. Tierrafino Paint is a decorative and 100% environmental friendly interior Claypaint product. It is wash-proof according to the standard DIN 53778.

### GENERAL

#### Properties

Tierrafino Paint can be used in a breathing construction, it is damp open and anti-static. These properties of Tierrafino Paint contribute to a healthy environment. It is easy to apply the Claypaint with a roller or paintbrush. Tierrafino Paint has excellent covering capacity, which is seen, as with all mineral paints, after drying.

#### Storage

Tierrafino Paint should be stored in a cool and dry place, never below 5° C. When left sealed the Clay Paint is bearable for at least 12 months. After opening Tierrafino Paint should be used within 6 weeks. It is therefore wise to carefully determine how much paint is needed for your project, so that you are not left with

8 liters of slowly decaying Claypaint. Tierrafino Paint's limited storage is due to its minimal content of preservatives.

#### Composition

Tierrafino Paint consists of: water, clay from different quarries, chalk, porcelain, vinegar-acid, methylcellulose, Titane-oxide (Dover-White), 0.1% synth. preservative.

#### Measurement of quantity

0.125 litres Tierrafino Clay Paint per square meter, about 8 square meters per litre for one layer applied.

#### Thinner

Water.

#### Suitable substrates

Use Tierrafino Clay Paint on dry, well absorbing and

grease-free substrates like wall paper, wood, gypsum plaster and other commonly used mineral substrates.

#### Drying time

Tierrafino Paint can be painted on again after 6-12 hours, depending on the room temperature and atmospheric humidity. After approx. 10 days Tierrafino Paint is fully ried out.

#### User possibilities

Different colours of Tierrafino Paint can be mixed. The same colour-range as with Tierrafino Clay plaster can be reached.

#### Tools

Paint-roller, paintbrush, paint-sprayer, plastic trowel and polishing stone. After use these tools should immediately be cleaned with warm water and soap.
