

Rainwater tanks

Rainwater harvesting tanks for domestic and commercial systems

CR GRP Tanks

For all systems

Submarine shaped tanks with 750mm diameter access shaft. Tank diameters 1200, 1500 or 2500 mm dependent on size. Length varies with capacity. Manufactured to BS 4994. Class 2 shell suitable for installation in concrete surround.
110mm inlet. 110mm outlet. Pre-fitted with smoothing inlets and overflow trap if desired.
110mm duct connection for supply pipework and electrical connections.
110mm duct connection for optional venting.

Sizes:

For domestic and small commercial systems: 3000, 4000, 5000, 6000, 8000, 10000 litres

For large commercial and industrial systems: 12,000, 15,000, 18,000, 23,000, 27,000, 36,000, 45,000 litres

CR Recycled Polyethelene Tanks

For domestic systems

One piece, seamless tank made from recycled polyethelene. Its ribbed structure makes it extremely strong and ideal for free-standing situations such as basements.

Now 50% off list price

Sizes: 850, 1000, 3900 litres

We can also supply recycled 1500 litre tanks for above ground rainwater storage.

CR Concrete Tanks

For small domestic systems

One piece tanks pre-fitted with inlet and overflow trap. Cover slab suitable for vehicle access, to be jointed on site. Access via brick manhole.
20 year structural guarantee

For large commercial and industrial systems

Modular concrete ring tanks with heavy duty cover slab and inspection chamber. Supplied with all necessary 110 mm drainage connections.

Sizes: small - 2500, 3500, large - 10000 to 36000 litres

Made from pre-cast reinforced concrete.

Can be back filled with excavated soil if site conditions allow.

Installation of 12,000 litre rainwater storage tank at Queenswell Infants School, London

Tank prices start from £675. Please contact Construction Resources for installation and technical details of all tanks.

We recommend lockable manhole covers on all rainwater tanks. These can be ordered separately.
