## HOLZWEG TECHNICAL SHEET H27

---

### HOLZWEG FURNITURE POLISH

**Uses** *Holzweg Furniture Polish* is a fragrant concentrate of plant extracts for the regular care and cleaning of oiled, waxed and sealed interior wood surfaces.

**Properties** With its special combination of vinegar, alcohol and balsamic turpentine oil, which dissolve grease and dirt, *Holzweg Furniture Polish* removes virtually all household dirt and other deposits from wooden surfaces. It leaves a fine film that fills in small marks and scratches and gives the surface a fresh silky sheen.

**Colour** Clear

**Containers** 250 millilitre glass bottles

**Application** Wipe away dust with a dry cloth. Rub in *Holzweg Furniture Polish* as needed with a lint-free cloth. While working ensure that dirt taken up by the cloth is not put back onto the surface, by folding soiled areas of the cloth inwards. Leave the surface to dry for about 15 minutes, then go over again with a dry cloth to achieve a fine polish.

**Storage** Store sealed, in a cool but frost-free place.

**Ingredients** Vinegar, grain alcohol, balsamic turpentine oil, natural ethereal oils.

**Safety** **This product is inflammable and easily ignited!** While working do not smoke and use no naked flame. During and after application keep room well ventilated. Do not leave polish-soaked cloths lying around - they could self-ignite. Spread cloths out to dry outdoors or store them away in a sealed container. Store the polish sealed and out of the reach of children.

**Risk class** Inflammable! GGVS Class 3.3. UN number 126.3

This technical information sheet is intended to provide guidelines for retailers and users. However, the user is responsible for testing the product on the intended surface to make sure that it is suitable for his or her requirements. This sheet was issued in March 2000 and may be superseded by later editions.
